

A new dimension of freedom

Discover the boat for the new breed. The high-performance, lightweight family boat combining the Rigid Inflatable Boat (RIB) concept, carbon technology and intelligent contemporary Scandinavian design offers more freedom to explore than you've ever experienced.

Lightweight, environmentally friendly and fun to drive. The 800 is the first boat for the mass market built using lightweight construction and carbon fiber integration. So it consumes less fuel and is kind to the environment and your pocket. RIB technology makes the 800 great fun to drive and remarkably easy to handle, whatever the weather and even at exciting speeds.

Keeping the 800 on the trailer means no need for expensive storage, marinas or environmentally unfriendly toxic paint. Travel as far as your imagination takes you and hit the water whenever you feel like it. Handle a large family boat as easily as a water jet. An Agapi 800 can be transported behind a small family car on a normal driving license.

High-quality Swedish design. Stylish, smart and contemporary Swedish design means the 800 is more than comfortable enough for day cruising or weekend trips. With its versatility, exceptional performance and extremely low operational and maintenance costs, the Agapi 800 is ideal for the modern boater.

AGAPI SERVICES

We strive for boating with maximum freedom. It should be simple, fun and hassle free to own a boat. Therefore, we have developed services and ownership solutions tailored for a modern boat ownership.

AGAPI BOATING

Agapi Boating AB is a Swedish company founded in 2006. For us, boating is about one thing - *freedom*. This is why we have taken out a new course for the design and manufacture of high-performance, fuel-efficient family boats with an unbeatable mobility that we offer with new ownership and service solutions for a simple and fun boating life!
